

VIII. Providence Fire Department – Patient Care Report

The Providence Fire Department Patient Care Report identified Juvenile 1 as the patient and the front seat passenger in a motor vehicle collision (MVC). Rescue personnel reported that the patient was uncooperative and refused to answer questions during the medical assessment. As a result of the medical assessment, Rescue personnel advised that the patient had a minor abrasion on nose with small amount of blood. The patient was placed in a cervical collar and transported to Hasbro Children's Hospital. Please reference Appendix XXI for the Providence Fire Department's Patient Care Report.

IX. Medical Records

On Monday, July 19, 2021, a medical records release form was signed by [REDACTED] the mother of Juvenile 1 and sent to Lifespan, authorizing the disclosure of protected health information. Lifespan provided the Rhode Island State Police with a copy of the requested medical records for Juvenile 1. Please reference Appendix XXII for the Hasbro Children's Hospital medical records.
