Dan McKee

FYI

Message from Mike Magee after he read Christine's email

I plan to be in Jim Thorsen's office as soon as I get back to the statehouse until this is done

"Initial scope should include everything related to municipal education offices, as well as reviewing all state guidance and district plans for COVID-safe school reopening. The bureaucrats will say they don't need that but they do and it's the most important thing vis a vis your election. If possible I would also add review of all 1-time federal revenue related to education and RIDE plans for dispersing those funds.

As I understand it, the Master Purchasing Agreement allows you to start there and then later do a separate purchase order for more work on learning acceleration. "
